

Reviewing Team Q - Kristina, Mikayla, Sebastian

1. Overall feedback to teams project idea
  - a. Good project idea and overall scope of the project. Unique and interesting concept
2. Activity 1
  - a. Immediately, good video length, and good quality of work, time stamps in the description were helpful for navigating specific points of the video. Showed a good amount of content in a well paced video
3. Activity 2
  - a. Continued with the consistency of the last video, covered all required content, and showed a good level of quality for documents, with a good explanation for each document. Well organized kanban that shows a good flow of what is going on in the project
    - i. Business case
      1. Gives a good detailed description of the cost-benefit analysis, and recommendation. Overall well done
    - ii. Project Charter
      1. Gives a fair due date for a majority of the project milestones, and also explained the project risks
    - iii. Project Requirements Document
      1. Gives short simple and clear instructions for what the requirements of the project will be functionally, and technically.
    - iv. Project Roles and Responsibilities
      1. Clear and simple explanation of the roles
    - v. Project scope statement
      1. Gives the user a good understanding of what will be happening throughout the process of the product
    - vi. Project Stakeholder Register
      1. Good formatting, shows a clear outlook of roles
    - vii. RACI Chart
      1. Well formatted chart, which shows an accurate description of whats going on
4. Activity 3
5. Video was very well edited, have timestamps for every document, and explained all the documents in detail. Very well done.
  - a. Finished all of the required documents on time, and have a good quality of work.
    - i. MVC
      1. Gives a well enough description of what will happen in the model, controller and view. Explained further in video
    - ii. Data flow diagram
      1. Shows how data flows well
    - iii. Communication diagram

1. Shows a good representation of how their website will work from the eyes on a user, and shows the possibilities of what can happen
- iv. Class diagram
  1. Shown a good flow of how a user would use the website, and what would be a possible user experience
- v. Sequence diagram
  1. Gives an accurate representation of what would happen when finding a recipe
- vi. Use case story diagram
  1. A little confusing to understand at first, because the lines are connecting everywhere, but after watching the video, the it is explained fairly well
6. Closing feedback
  - a. Overall I think these folks are on the right track and will create a good final product that will not disappoint. Their videos have good length and overall
7. Other
  - a. No other comments
