TEAM REINTRODUCTIONS

Muhammad

Project Manager /
Full Stack Developer

Feras

Front End Developer

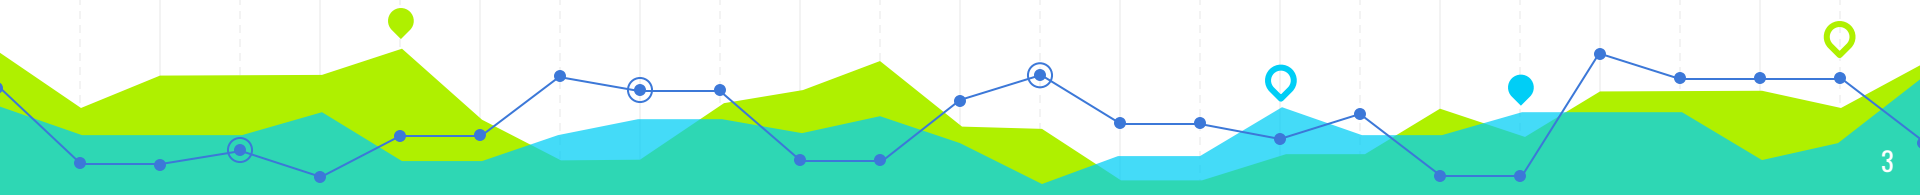

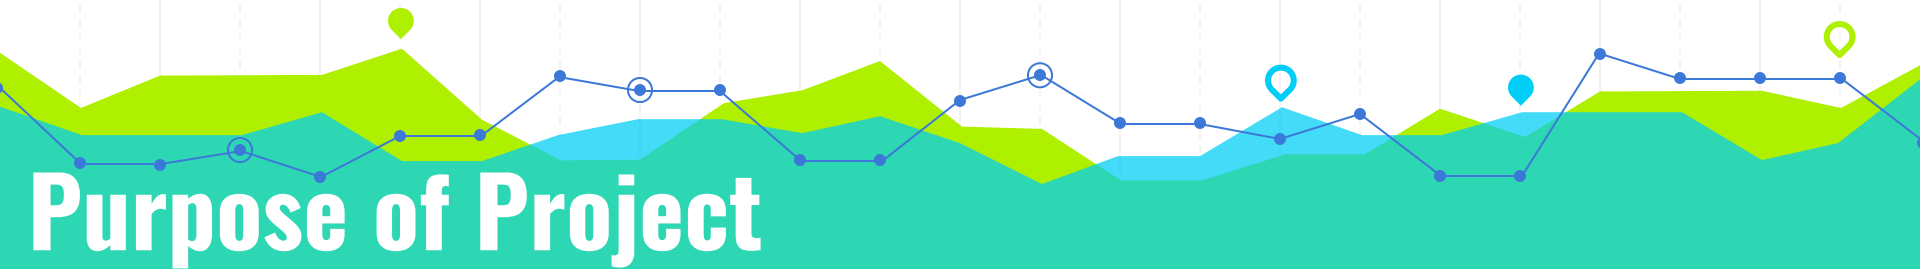

Ehab

Backend Developer

Agenda

- Purpose of the Project
- Project Process
- Roles and Responsibilities
- Project Kanban
- MVP Demo
- Project Reflection

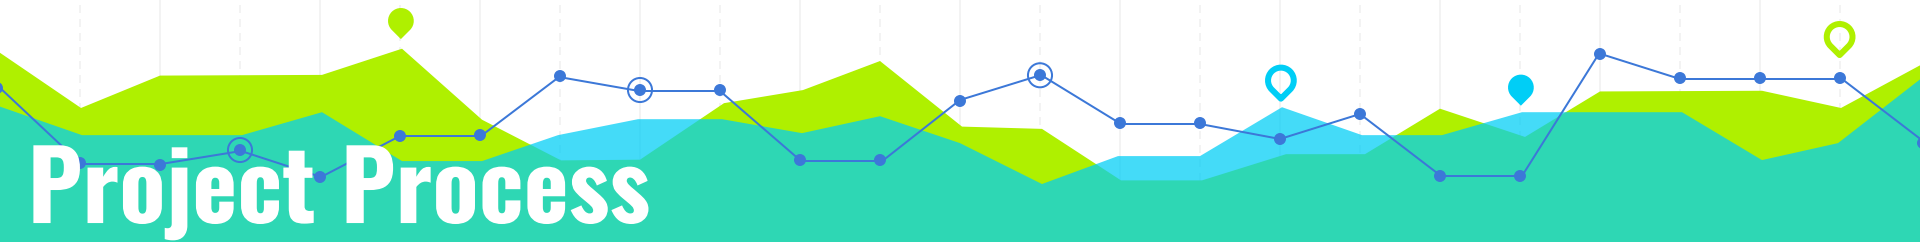

Purpose of Project

Project Idea:

- A lot of people in business either don't know where or how to make memes. So we give them the simple solution of a collective storage of memes, where you can upload and store memes.

Why?

- It's simple, easy, and user friendly to use. You're able to upload and anyone can use your meme.

Our main idea for the project was creating a meme generation. During the process of the project, we had to change our project idea to create a meme storage instead of meme generator.

The main reason of changing the project idea was because we realized that continuing with the original idea will require us more time than what we have left.

Although we changed our idea, we kept it similar to achieve the main goal, which is having more smiles on people faces.

Roles and Responsibilities

Name	Role	Responsibilities
Feras Aljoudi	Front-end Developer	<ul style="list-style-type: none">• Working with Ihab, the Back-end Developer, to improve the usability of the design.• Developing the standards of code, so it is easily to define them in the future if there is need.• Creating web pages by using different software languages such as HTML, JavaScript, Css...
Ihab Mohamad	Back-end Developer	<ul style="list-style-type: none">• Ensuring that the requirements are at high level design.• Testing and debugging the code to make sure it is reliable and scalable.• Stay up to date with new technologies to improve the design.
Muhammad Zaman	Project Manager	<ul style="list-style-type: none">• Managing the scheduling, the execution, and the delivery of the design.• Ensuring the successful completion of the design.• Participating and supervising the front-end and the back-end developers in each stage of the design.

User Stories 2

Draft

As an admin for an Instagram meme page I don't want to get lost in the process of finding the memes because of how complex some UI can be

Draft

As a Facebook user, I like quick access to my memes so I can quickly reference them

DEMO

Project Reflection

- Fun project to work on.
- Learned a lot about teamwork.
- We had time conflict since each one of us had other classes as well, but with a good communication we were able to put the needed time in the project and succeeded.
- Preparing documentations and how helpful it can be.
- We think that we successfully achieved what we set out to achieve .

Thank You

Any questions?
