PROJECT REQUIREMENTS DOCUMENT	
Project Name	Meme Generator

Functional Requirements

Enable the user to create their unique meme.
Provide the user with suggested meme images and/or enable them to upload their own ones and edit them.
Enable the user to download the generated meme to their device from the browser.
Ensuring that our design is available for users to use on any web browser they use.

Technical/Performance Requirements

To complete our design, we will be using markup, style and high level programming languages such as HTML, CSS and JAVASCRIPT.
GitHub will be also used as an internet hosting service to make our design accessible by everyone.
